

FB4648V2

8Ω

Crossovers

DESCRIPTION

Reinforced PRO version of the popular FB464 crossover, for more challenging applications. The FB464v2 shares the same circuit diagram of the FB464, substituting inductors with higher power ratings and eliminating the built-in light bulb protection network. The FB464v2 allows the user more control to optimize DSP limiter settings for higher maximum SPL while maintaining a safe work margin for the DCX464/462.
