

# 10CXN64

**8Ω****Coaxials - 10.0 Inches**

- 500 W continuous program power capacity
- 70° nominal coverage
- 70 - 18000 Hz response
- 97 dB sensitivity
- 33 mm (1.3") HF unit exit diameter
- Single Neodymium magnet assembly
- Aluminium demodulating ring allows a very low distortion figure

Continuing our never-ending quest for higher output, we now offer our popular single neodymium magnet coaxials with larger voice coils for increased power handling. A significant increase in magnet mass also improves sensitivity and cone control, while integrating our latest compression driver technologies improves sound quality and durability in the HF as well. For high output applications where fidelity at maximum SPL is the primary concern, consider the 10CXN64 with 2.5" LF & HF voice coils. Power handling has increased to 500W, while also improving nearly every other parameter (including Xvar) relative to our established 10" coax models.
