

PRESS RELEASE

Silence Tech Is Here technology start-up from B&C Speakers.

Using unique and innovative technology, Silence Tech will create systems able to increase acoustic comfort, significantly reducing ambient noise (active noise cancelling).

Bagno a Ripoli (Florence), 16 December 2015 – B&C Speakers announced that today marks the foundation of Silence Tech Srl, a joint venture between B&C Speakers and two high specialised companies in the field of digital amplification and audio systems. The new company will focus on the design and construction of a wide range of products for active noise cancelling.

The corporate mission of Silence Tech Srl is the “design, construction and installation of products/systems for active and passive noise cancelling”. In particular, the company will focus on the design and production of active and passive noise-cancelling systems capable of significantly reducing ambient noise and increasing acoustic comfort, consequently improving the quality of life of all those who regularly visit the areas where the technology is applied.

B&C Speakers S.p.A. is an international leader in the design, production, distribution and marketing of professional electro-acoustic transducers (the main component in acoustic speakers for music, commonly referred to as loudspeakers), supplied mainly to professional audio system manufacturers (OEM) and is listed on the MTA market organised and managed by Borsa Italiana. With 100 employees and approximately 10% of staff assigned to its Research and Development Department, B&C Speakers carries out all design, production, marketing and control activities at its headquarters in Florence. Most of its products are developed according to its key customers' specifications. Since 2010 B&C Speakers has also been operating in the US and Brazil through two subsidiaries carrying out commercial activities.
